Technical specifications

Type	Threaded adaptor for the top of a cone
Material	Polypropylene (PP)
Colour	Black
Shape	Conical, with a lengthwise slot and a side hole
What fits on it	A small plastic sign or a warning lamp

Description

The ATO 3900 is the part that turns an ordinary cone into a mount. It fits on the top of the cone, and above it has a thread into which a small plastic sign or a warning lamp screws.

Why you need it

A cone marks an area but does not say what is there. With the adaptor you can put a sign on the cone, and a lamp at night, without bringing a separate post for them.

What it looks like

It is a black, tapered part with a lengthwise slot, so it grips the top of the cone, and a side hole. The thread is at the top.

Technical data

- PP (polypropylene), black;
- 10 × 7 cm;
- 60 g.

Other cone accessories

To link cones together, use the ATO 3800 extendable bar or the ATZ 101A hook with a chain. For stability, the 4 kg ATO 3951 base goes over the base of the cone.

Cum se folosește
How it is used

ATO 3900

Adaptorul se pune pe vârful conului; în filetul de sus se înșurubează un indicator mic din plastic sau o lampă.
The adaptor goes on the cone top; a small plastic sign or a lamp screws into the thread on top.
