Technical specifications

Type	Adhesive floor marking tape
Material	PVC, abrasion-resistant backing
Width	10 cm
Length	30 m
Color	Yellow and black, diagonal stripes
Use	Permanent obstacles and dangerous spots (ASR A1.3)
Application	On a clean, dry floor free of dust or oil; press it down firmly, especially at the ends; tears by hand
Duration	For temporary markings

Description

The ATZ R08 is the 10 cm version of the yellow-black tape. Under ASR A1.3, yellow-black belongs to permanent hazards, where you can bump into something, get caught or fall, and the double width shows from a forklift cab: the edge of a loading ramp, the area around a machine, a column in the middle of an aisle.

Technical data

- width: 10 cm;

- length: 30 m per roll;
- material: PVC;
- colour: diagonal yellow and black stripes;
- weight: 0.6 kg.

The colour under ASR A1.3

The stripes are diagonal. ASR A1.3 asks for them at about 45° and equally wide, over the whole size of the obstacle. For temporary hazards, the same rule recommends red-white.

How much you need

A 1 × 1.5 m rectangle around a column or a machine takes 5 m of tape, so one 30 m roll covers 6 such areas.

Applying it

Clean and dry the floor, then lay the tape along a chalk line and press it down firmly along its length and at the corners. It tears by hand, no scissors needed. The PVC backing resists abrasion, but the tape is made for temporary markings.

Other versions

Narrower, at 5 cm, is the ATO 8200-YBK. For temporary hazards, the 10 cm red-white is the ATO 8250-RW; the 10 cm yellow-black reflective version is the ATZ R04.
