Technical specifications

Type	Adhesive floor marking tape
Material	PVC, abrasion-resistant backing
Width	5 cm
Length	30 m
Color	Yellow and black, diagonal stripes
Use	Permanent obstacles and dangerous spots (ASR A1.3)
Application	On a clean, dry floor free of dust or oil; press it down firmly, especially at the ends; tears by hand
Duration	For temporary markings

Description

Under ASR A1.3, yellow-black marks permanent obstacles and dangerous spots, places where you can bump into something, get caught or fall. With the ATO 8200-YBK you mark on the floor the edge of a step, a threshold, the edge of a ramp or the perimeter of a press.

Technical data

- width: 5 cm;
- length: 30 m per roll;
- material: PVC;
- colour: diagonal yellow and black stripes;

- weight: 0.3 kg.

The colour under ASR A1.3

The stripes are diagonal. ASR A1.3 asks for them at about 45° and equally wide, over the whole size of the obstacle. For temporary hazards, the same rule recommends red-white.

How much you need

A 1 × 1.5 m rectangle around a column or a machine takes 5 m of tape, so one 30 m roll covers 6 such areas.

Applying it

The floor must be clean, dry and free of dust or oil. Mark the line with chalk, lay the tape as you unroll it and press it down well, especially at the ends. It tears by hand and the PVC backing resists abrasion; the tape is meant for temporary markings.

Other versions

Wider, at 10 cm, is the ATZ R08. For temporary hazards there is the red-white ATO 8200-RW, and for a marking that also shows in headlights, the yellow-black reflective ATO 8402.
