Technical specifications

Type	Adhesive floor marking tape
Material	PVC, abrasion-resistant backing
Width	5 cm
Length	30 m
Color	Red (RAL 3002)
Use	Prohibitions and firefighting equipment (ASR A1.3)
Application	On a clean, dry floor free of dust or oil; press it down firmly, especially at the ends; tears by hand
Duration	For temporary markings

Description

Under Germany's workplace rule ASR A1.3, red means prohibition and fire protection. The ATO 8200-R marks on the floor where an extinguisher or a hydrant stands, so it can be seen from a distance, and areas where a prohibition applies.

Technical data

- width: 5 cm;
- length: 30 m per roll;
- material: PVC;
- colour: red RAL 3002;
- weight: 0.3 kg.

The colour under ASR A1.3

The tape's shade is RAL 3002. For the safety red, ASR A1.3 refers to ISO 3864-4, usually given as RAL 3001.

How much you need

A 1 × 1.5 m rectangle around an extinguisher or a hydrant takes 5 m of tape, so one 30 m roll covers 6 such areas.

Applying it

The floor must be clean, dry and free of dust or oil. Mark the line with chalk, lay the tape as you unroll it and press it down well, especially at the ends. It tears by hand and the PVC backing resists abrasion; the tape is meant for temporary markings.

Other versions

Wider, at 10 cm, is the ATO 8250-R. For escape routes and first aid there is the green ATO 8200-G.
