Technical specifications

Type	Adhesive floor marking tape
Material	PVC, abrasion-resistant backing
Width	10 cm
Length	30 m
Color	Red and white, diagonal stripes
Use	Temporary obstacles and dangerous spots (ASR A1.3)
Application	On a clean, dry floor free of dust or oil; press it down firmly, especially at the ends; tears by hand
Duration	For temporary markings

Description

The ATO 8250-RW has the same red and white stripes in a 10 cm width. Under ASR A1.3, red-white belongs to temporary hazards, and the wide tape makes them visible from a distance: the area around a machine under repair, a stretch of floor closed while work goes on or an open pit in a large hall.

Technical data

- width: 10 cm;
- length: 30 m per roll;
- material: PVC;
- colour: diagonal red and white stripes;

- weight: 0.6 kg.

The colour under ASR A1.3

The stripes are diagonal. ASR A1.3 asks for them at about 45° and equally wide, over the whole size of the obstacle. For permanent hazards, the same rule recommends yellow-black.

How much you need

A 1 × 1.5 m rectangle around a work area takes 5 m of tape, so one 30 m roll covers 6 such areas.

Applying it

Clean and dry the floor, then lay the tape along a chalk line and press it down firmly along its length and at the corners. It tears by hand, no scissors needed. The PVC backing resists abrasion, but the tape is made for temporary markings.

Other versions

Narrower, at 5 cm, is the ATO 8200-RW. For permanent hazards, the 10 cm yellow-black is the ATZ R08; the 10 cm red-white reflective version is the ATO 8403.
