Technical specifications

Type	Adhesive floor marking tape
Material	PVC, abrasion-resistant backing
Width	5 cm
Length	30 m
Color	Red and white, diagonal stripes
Use	Temporary obstacles and dangerous spots (ASR A1.3)
Application	On a clean, dry floor free of dust or oil; press it down firmly, especially at the ends; tears by hand
Duration	For temporary markings

Description

Under ASR A1.3, red-white marks temporary obstacles and dangerous spots; the rule gives an open excavation as an example. On a hall floor, the ATO 8200-RW frames an area where work is going on, a channel left open during a repair or an obstacle that stays only a few days.

Technical data

- width: 5 cm;
- length: 30 m per roll;
- material: PVC;
- colour: diagonal red and white stripes;

- weight: 0.3 kg.

The colour under ASR A1.3

The stripes are diagonal. ASR A1.3 asks for them at about 45° and equally wide, over the whole size of the obstacle. For permanent hazards, the same rule recommends yellow-black.

How much you need

A 1 × 1.5 m rectangle around a work area takes 5 m of tape, so one 30 m roll covers 6 such areas.

Applying it

The floor must be clean, dry and free of dust or oil. Mark the line with chalk, lay the tape as you unroll it and press it down well, especially at the ends. It tears by hand and the PVC backing resists abrasion; the tape is meant for temporary markings.

Other versions

Wider, at 10 cm, is the ATO 8250-RW. For permanent hazards there is the yellow-black ATO 8200-YBK, and for a marking that also shows at night, the red-white reflective ATZ R01.
