Technical specifications

Type	Self-adhesive anti-slip tape
Surface	Gritted, like fine sandpaper
Width	2.5 cm
Length	25 m
Color	Black
Resistance	Does not shrink; withstands temperature changes, humidity, UV and detergents
Application	On a clean, dry, grease-free surface; tears by hand, press it down firmly; 1-2 cm from the edge of the step

Description

Not every surface has room for a 5 cm tape. The ATZ R09 is only 2.5 cm wide and fits ladder rungs, the thin edges of steps, the pedals or steps of a machine and the edge of a narrow ramp. It has the same gritty surface as the wide version and sticks straight on.

Technical data

- width: 2.5 cm;
- length: 25 m per roll;
- colour: black;
- weight: 0.4 kg.

How to lay it

On wide steps you can lay two parallel strips a few centimetres apart: the grip is good and the step looks less covered. A ladder with 20 rungs of 40 cm uses 8 m, so one roll does three ladders.

Durability and application

The tape does not shrink after application and withstands temperature changes, moisture, UV and cleaning products. It tears by hand and goes onto a clean, dry surface, pressed down firmly.

Where it is used

On step ladders and fixed ladders, in workshops, on machinery and on outdoor wooden or metal steps, at home or in industrial spaces.

Wider

For full steps, ramps and platforms, choose the ATZ R11, 5 cm x 25 m.
