Technical specifications

Type	Self-adhesive anti-slip tape
Surface	Gritted, like fine sandpaper
Width	5 cm
Length	15 m
Color	Black
Resistance	Does not shrink; withstands temperature changes, humidity, UV and detergents
Application	On a clean, dry, grease-free surface; tears by hand, press it down firmly; 1-2 cm from the edge of the step

Description

If you only have one staircase to treat, a 25 m roll is too much. The ATZ R10 has the same 5 cm width and gritty surface as the ATZ R11, but 15 m of it: enough for the steps at a house entrance, the steps of a terrace or a short ramp.

Technical data

- width: 5 cm;
- length: 15 m per roll;
- colour: black;
- self-adhesive, tears by hand.

How much you need

Multiply the number of steps by their width. A staircase with 12 steps of 1.2 m uses 14.4 m, so one roll is enough. For several staircases, the 25 m ATZ R11 roll works out better.

Durability

Adhesion is very good, the tape does not shrink and it withstands temperature changes, moisture, UV and cleaning products, so the steps can be washed without worry.

Applying it

The surface must be clean, dry and free of grease. Stick the tape 1-2 cm from the edge of the step, where the foot lands, and press it down firmly along its length.

Other sizes

For ladder rungs and narrow edges, the ATZ R09 is 2.5 cm wide.
