Technical specifications

Type	Barrier tape, non-adhesive
Material	Polyethylene (PE)
Thickness	At least 60 µm
Width	6 cm
Length	200 m
Color	Red and white, diagonal stripes
Installation	Tied to posts, cones, fences or trees and stretched between them; leaves no marks

Description

Red and white tape is the first thing you put up when an area has to be closed off quickly: an open trench, a stretch of pavement under repair, the scene of an accident or the entrance to a building where work is going on. The ATO 8020 is a non-adhesive polyethylene tape with diagonal red and white stripes on a 200 m roll.

Technical data

- width: 6 cm;
- length: 200 m per roll;
- material: polyethylene (PE), at least 60 microns thick;
- colour: red and white;
- weight: 0.4 kg.

How it is used

The tape is tied to posts, cones, fences or trees and stretched between them. It has no adhesive, so it leaves no marks and is easy to take down once the job is done. A 30 × 20 m area needs 100 m, so one roll covers two areas of that size.

Where it is used

For road and utility works, on building sites, in car parks closed off for a while, at events or around a hazard after a breakdown.

Other versions

For large perimeters, the ATZ R12 roll holds 500 m of red-white tape. In yellow-black, also 200 m, there is the ATO 8120. For a boundary you can reuse, see the V1-80RW plastic chain.
