Technical specifications

Type	Conspicuity tape for vehicle contour marking
Approval	ECE 104, class C; E11, 104R mark on the roll
Width	5 cm
Length	46 m
Color	Red
Position on the vehicle	Rear
Surface	Clean, dry and rust-free; press it down along its whole length
Rear marking	Full contour, where the vehicle's build allows

Description

The ATO 8414 is the red ECE 104 class C approved tape for the rear conspicuity marking of lorries, trailers and semi-trailers. Red is used only at the rear, where it adds to the lamps and tells the driver behind how wide and tall the vehicle in front is. The tape carries the E11 mark with the 104R approval number.

Technical data

- width: 5 cm;
- length: 46 m per roll;
- colour: red;
- approval: ECE 104, class C;
- weight: 1.2 kg.

The rear marking

The rear gets a full outline, unless the vehicle's construction does not allow it. The lower horizontal line follows the same heights as the side markings: at least 250 mm above the ground and at most 1500 mm, or 2500 mm in special cases.

How much you need

A full outline of the rear of a 2.55 × 4 m semi-trailer is about 13 m, so one roll does 3 vehicles.

Applying it

Apply the tape to a clean, dry, rust-free surface, pressing it down well along its length.

Other colours

For the sides use white, the ATO 8415, or yellow, the ATO 8413, which works on both the sides and the rear.
