Technical specifications

Type	Extendable cone bar
Length	120 cm closed, 190 cm extended
Material	PE and PP
Colour	White and red
Fixing	A ring at each end that slips over the cone top

Description

Two cones set apart show where the closed area is, but a pedestrian or a hurried driver can still slip between them. The ATO 3800 bar fills the gap: it fits between two cones and turns a row of cones into a continuous barrier that is much easier to see.

How it fits

Each end has a ring that slips over the top of a cone. The bar is 120 cm closed and extends to 190 cm, so you adjust it to the distance between the cones.

Where it is used

In car parks, around hazardous areas, at pedestrian crossings and in areas where work is under way.

Technical data

- 120 cm long, 190 cm extended;
- 5 cm across;
- PE and PP;
- 0.4 kg;
- white-red stripes.

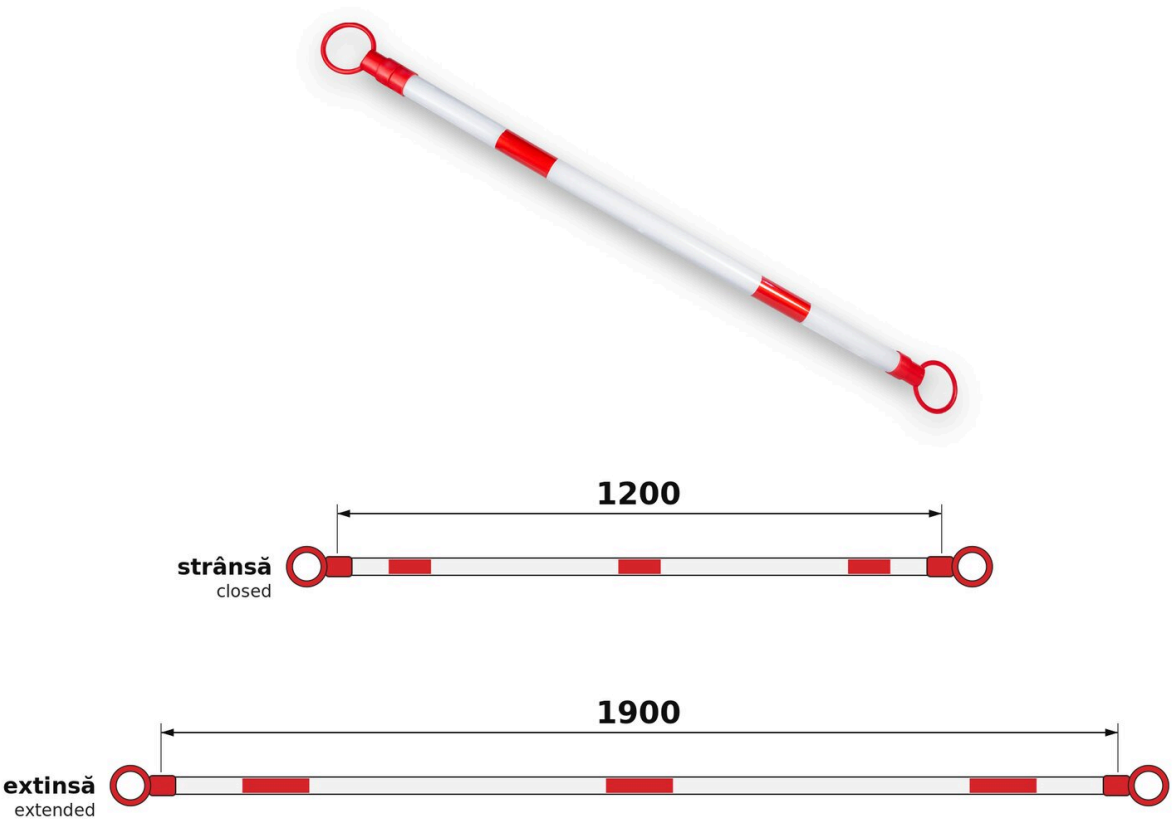

Which cones

It fits between two cones, for example two V6-70R2 cones. In yellow-black, the same bar is the ATO 3800/B.

Cum se folosește
How it is used

ATO 3800

Inelele de la capete se trag peste vârfurile conurilor
The rings at the ends slip over the cone tops

Exemplu: 6 m închiși cu 4 conuri și 3 bare
Example: 6 m closed off with 4 cones and 3 bars

Bara se lungește de la 120 la 190 cm, deci o potrivești după distanța dintre conuri.
The bar extends from 120 to 190 cm, so you set it to the gap between the cones.
