Technical specifications

Type	Extendable cone bar
Length	120 cm closed, 190 cm extended
Material	PE and PP
Colour	Yellow and black
Fixing	A ring at each end that slips over the cone top

Description

The ATO 3800/B is the yellow-black version of the extendable cone bar. Yellow and black is the combination often used in halls, warehouses and industrial areas, where the bar matches the floor markings.

How it works

The bar fits between two cones: the rings at the ends slip over their tops. It is 120 cm closed and extends to 190 cm, so it covers different gaps between cones.

What it is for

It turns a row of cones into a continuous, more visible barrier in car parks, around hazardous areas, at pedestrian crossings and in work areas.

Technical data

120 cm long, 190 cm extended, 5 cm across, made of PE and PP, 0.4 kg.

Example

To close off an area over 6 m with the bars extended close to their maximum, you need 4 cones and 3 bars.

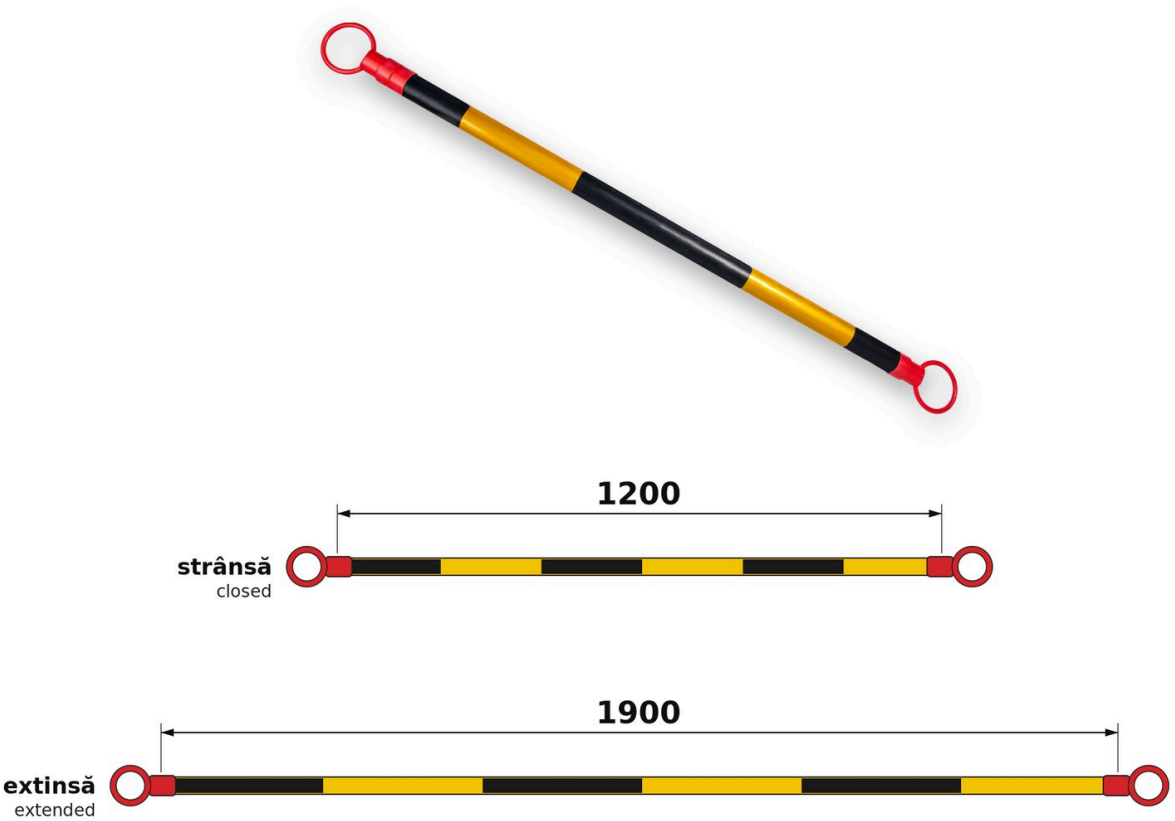

White-red version

The same bar with white-red stripes is the ATO 3800.

Cum se folosește
How it is used

ATO 3800/B

Inelele de la capete se trag peste vârfurile conurilor
The rings at the ends slip over the cone tops

Exemplu: 6 m închiși cu 4 conuri și 3 bare
Example: 6 m closed off with 4 cones and 3 bars

Bara se lungește de la 120 la 190 cm, deci o potrivești după distanța dintre conuri.
The bar extends from 120 to 190 cm, so you set it to the gap between the cones.
