Technical specifications

Material	Painted Steel
Size (Post)	Ø50 mm
Thickness (Post)	3 mm
Color	Yellow
Reflective	6 Film
Installation	12 Dowels, 12 Screws
Width	35-50 cm
Arm Length	30 cm

Description

The ATO 6357 is made of 2 pieces of yellow steel tube that join like a construction set: the 30 cm arms of each piece go into the opposite piece. Once joined, the barrier is between 35 and 50 cm wide, depending on how far the arms go in, and it protects an object from every side.

Technical data

- Ø50 mm steel tube, 3 mm wall, powder-coated;
- 60 cm high, 50 cm long;
- 30 cm arms on each piece, installed width between 35 and 50 cm;
- 4 legs, each with a plate with 3 holes;

- yellow with 6 black bands;
- weight: 5 kg.

Installation

Join the 2 pieces at the width you need, then fix the plates into concrete at 12 points, with the 12 anchors and 12 screws included free of charge.

Where it is used

Around an object that needs protecting from every side: a hydrant, a meter, a small electrical cabinet or a thin post, in halls, warehouses and car parks.

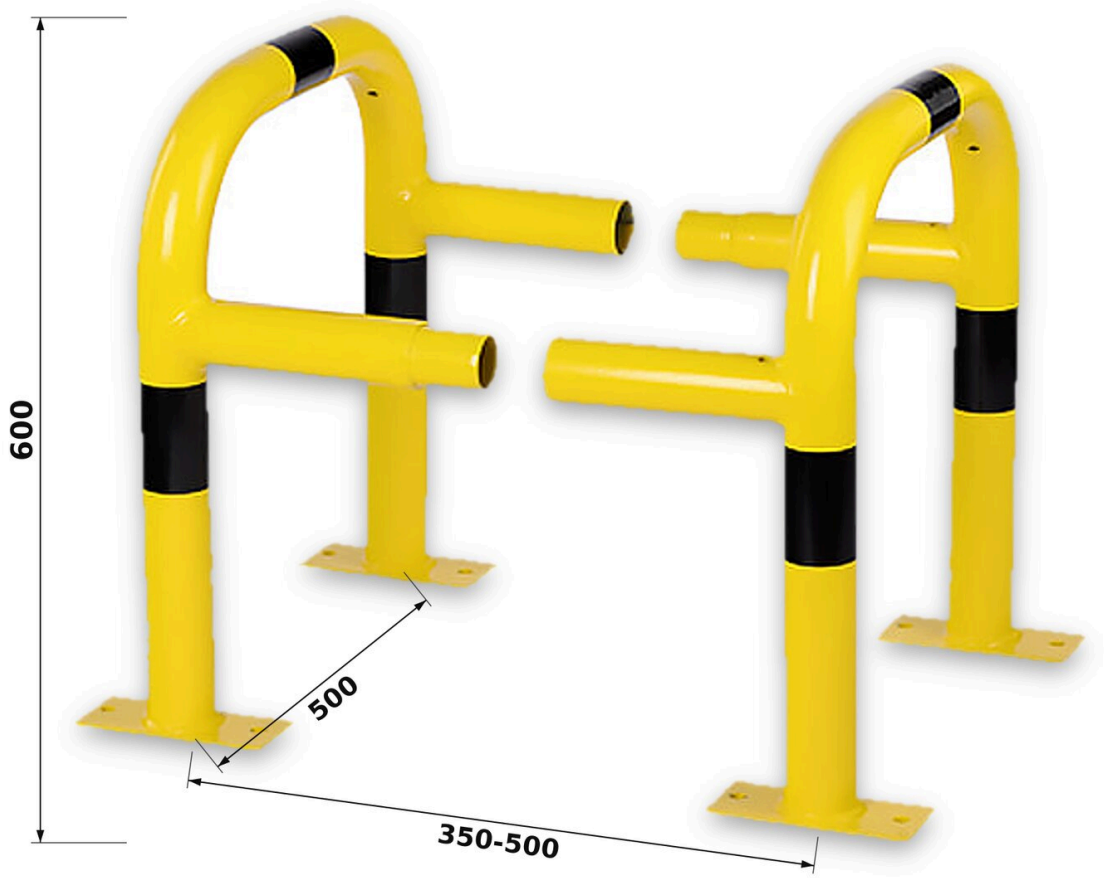

Other shapes

For a single short side, the ATO 6354 hoop is enough. For a corner guarded on both sides, see the ATO 6353.

Cum se folosește
How it is used

ATO 6357

2 piese în jurul unui obiect, apărat din toate părțile
2 pieces around an object, protected from every side

Brațele de 30 cm ale fiecărei piese intră în piesa din față, deci lățimea se alege între 35 și 50 cm.
The 30 cm arms of each piece go into the opposite piece, so the width can be set between 35 and 50 cm.
