Technical specifications

Weight (Filled)	9 Kg
Dimensions (Extended)	250 × 40 × 95 cm
Material	HDPE
Color	Yellow
Reflective	32 reflective strips

Description

It weighs only 2 kg, so you carry it in one hand and can keep it in the service van all the time. The posts are yellow HDPE, and between them are black hinged bars that open up to 250 cm.

Stability

Empty, the barrier weighs 2 kg. Filled, it reaches 9 kg, which makes it harder for the wind, or someone leaning on it, to move it.

Dimensions

- open: 250 × 40 × 95 cm;
- closed: 25 × 40 × 95 cm;
- 32 yellow and white reflective strips on the bars and posts.

Where it works well

Indoors and over short distances: a building lobby being cleaned, an access door during a repair, a lift under inspection, the edge of an inspection pit in a garage. Yellow and black is easy to recognise as a hazard warning.

Compared with the ATZ PB02

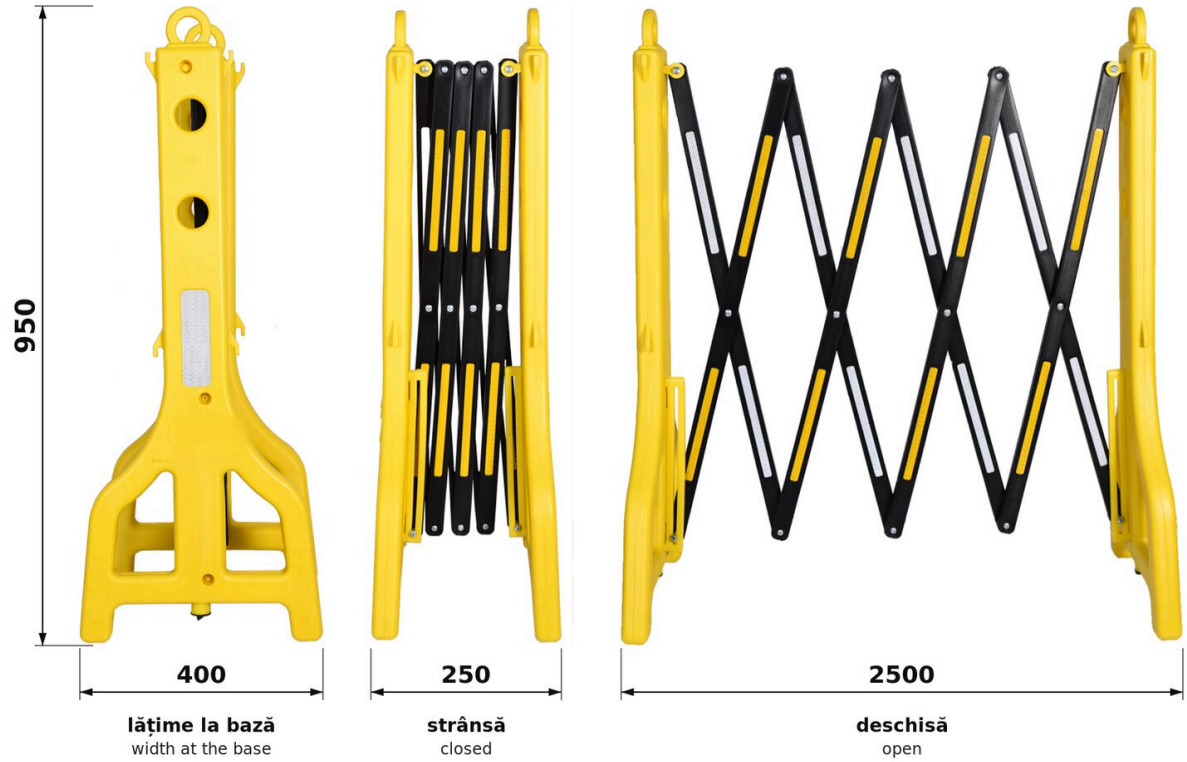

The red version is taller at 110 cm, opens to 230 cm and weighs 7.5 kg. For something sturdier outdoors take that one; for something easy to carry everywhere, take this one.
