Description

The 50Ah battery is the choice for long jobs. It has 5-7 times the capacity of the 7-9Ah battery, the V8-B67. The V8-Y2 takes two, which last about 4500 hours, for the longest jobs.

Why running time matters

On a site with dozens of lamps, every battery change means time and an extra trip. With the 50Ah battery, a V8-Y or V8-R lamp runs for about 2800 hours without being touched.

Type

It is a 6V 4R25 zinc-carbon battery with terminals on top, non-rechargeable: when it runs down, you replace it. It contains no lead, mercury or cadmium.
