Color	Yellow (RAL 1023)
Mounting System	Dowels Ø16 × 90 mm (x3), Screws Ø10×110 mm (x3)
Pipe Diameter	Ø45 mm

Description

This is the simplest parking lock we sell and the most affordable one. It closes with a padlock, and the padlock is your choice: one you already own, or a heavier one if the space is in a courtyard with a lot of foot traffic.

The body is electrostatically painted steel in yellow RAL 1023 and weighs 3 kg. Raised, it stands 48 cm tall and 38 cm wide, on a 38×9×4.5 cm base, with a Ø45 mm pipe, so it is plainly visible from the car park lane.

How you use it

When you arrive, unlock the padlock and lay the lock down. Folded it measures 38×55×9 cm, so the car drives over it and you park on top. When you leave, lift it up and lock it again.

What you need to fit it

It fixes to concrete or asphalt at 3 points, with 3 anchors Ø16×90 mm and 3 bolts Ø10×110 mm supplied in the box. You need a hammer drill, a 16 mm bit and a spanner for the bolts.

Padlock not included

If you would rather not buy anything separately, the ATZ M601A has the same construction but comes with a key lock already fitted.

The other models, with key, folding or spherical, are in the parking blockers category.

Cum se folosește
How it is used

ATZ M602A

Când ajungi, descui și culci blocatorul la sol. Când pleci, îl ridici și îl încui la loc.
When you arrive, unlock it and fold it down. When you leave, raise it and lock it again.
La mașinile foarte joase, verifică garda la sol: pliat are 9 cm înălțime.
For very low cars, check the ground clearance: folded it is 9 cm high.
