Technical specifications

Type	Reflective road stud, screw-fixed
Material	PPC
Colour	Yellow
Reflectors	6 red glass lenses, 3 on each long side
Installation	4 screws and 4 anchors, included
Orientation	Long side across the direction of travel

Description

The ATO 5140 is the longest PPC stud in the range: 22 cm, oval, with 6 red glass lenses, three on each long side. Its length makes it a good fit for dividing lines, where a few studs in a row read as a continuous line.

Technical data

- dimensions: 22 × 12 cm;
- height: 3 cm;
- material: PPC, yellow;
- reflectors: 6 glass lenses;
- weight: 230 g.

Installation

It is fixed with 4 screws and 4 anchors, included. Lay the stud with its long side across the direction of travel, so the lenses on the two long sides face traffic coming from both directions.

Where it is used

Between the lanes of a car park ramp, on the centre line of a driveway, to separate a cycle lane or around loading areas.

Same series

The shorter 13 × 9 cm ATO 5100 has 4 glass lenses, and the 15 × 13 cm ATO 5120 has 4 cat's eyes. An elongated stud with 8 reflectors is the ATZ 8002.
