Technical specifications

Material	PPC
Color	Red
Dimensions	Ø5.1 × 5.4 cm
Thread	Ø35 mm, 20 mm long

Description

The ATZ 101A is a small accessory that fits into the top of a delineator post or a traffic cone. The lower part, with a Ø35 mm thread, screws into the thread at the top, leaving a ring above to which you fasten a chain, with the ATZ 330A hook, or through which you pass barrier tape. On cones with a loop on top, cut off the loop first.

What it is for

With a hook on each post or cone, you link several pieces together and close off an area: a reserved parking space, a stretch of pavement under repair, an entrance that has to be blocked for a while.

Material and weight

It is made of red PPC (polypropylene copolymer) and weighs 50 g. Red shows up well on orange, yellow or black cones and posts.

How many you need

One hook for each post or cone in the row. A row of 8 cones linked by a chain takes 8 hooks.

Where to find the rest

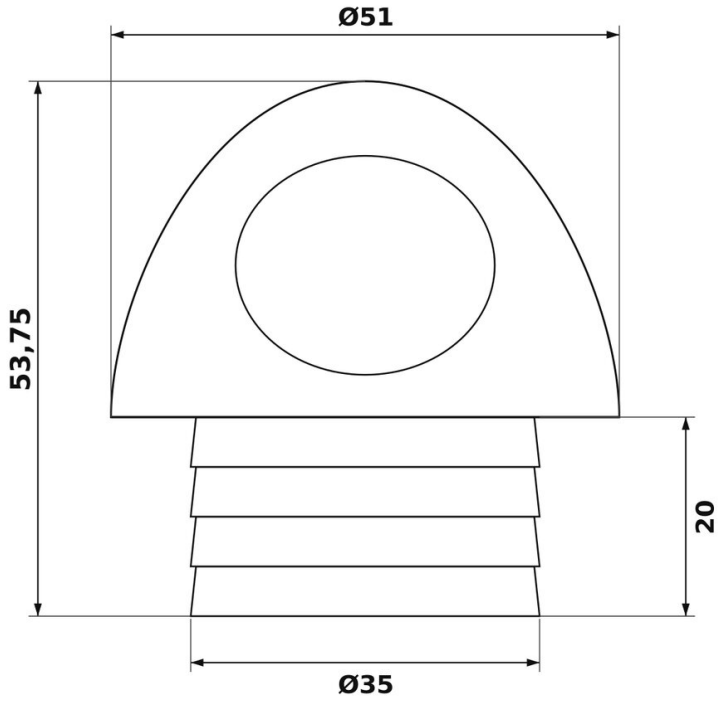

Cones are in the traffic cones category, and posts with a movable base in the movable delineator posts category.

Se înșurubează în vârf; lanțul se prinde de inel **ATZ 101A**

Screws in at the top; the chain fastens to the ring

Inelul și cârligul de lanț

The ring and the chain hook

Pe conurile cu buclă în vârf, bucla se taie mai întâi; dedesubt e filetul Ø35 mm.

On cones with a loop on top, cut off the loop first; the Ø35 mm thread is underneath.

Lanțul se prinde de inel cu cârligul ATZ 330A, care se comandă separat.

The chain fastens to the ring with the ATZ 330A hook, ordered separately.

Se potrivește pe conuri, stâlpi delimitatori flexibili și stâlpi mobili cu filet.

It fits cones, flexible delineator posts and threaded mobile posts.
