| **Material** | PPC |
| **Color** | Black |
| **Shape** | Figure 8, open on one side |
| **Weight** | 6 g |

## Description

A chain running between posts has to stop somewhere. The ATZ 330A is the hook that holds the chain end in place: you clip it onto a link and hang the other loop on the ring of the hook at the top of the post or on another length of chain. That way you can join two lengths of chain sold by the metre, or open and close a lane quickly.

### Shape and material

The hook is shaped like a figure 8, with two loops, and is open on one side, where the link goes in. It is made of black PPC plastic and weighs 6 g, so it adds no weight to the chain and does not rust outdoors.

### Which chains it is for

It is designed for plastic chains: by the metre, for example the V1-80RW, V1-80YB or V1-60YB, and on rolls, for example the V1-801 or V1-803.

### How many you need

Count the free ends: a chain between two posts needs 2 hooks, and each join between two lengths needs one more. For a lane that is opened every day, one hook at the moving end is enough.

### For cones

If you hang the chain on cones, you also need the red ATZ 101A hook, which screws into the top of the cone. The ATZ 330A fastens the chain to its ring.

## Drawings and details · 1/3

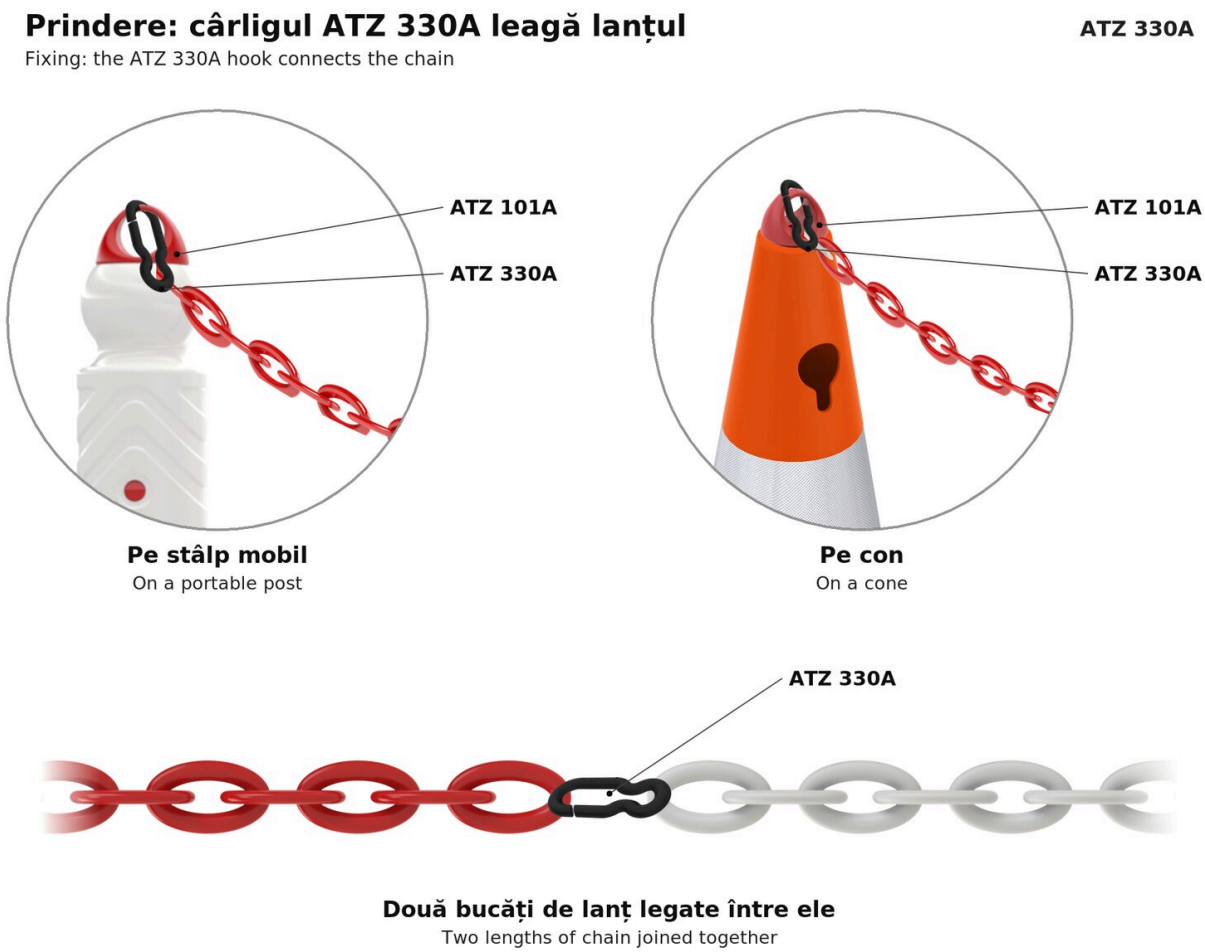

**Formă de 8, deschis pe o latură** — **ATZ 330A**
Figure-8 shape, open on one side

Plastic PPC, negru, 6 g. Nu ruginește afară.
Black PPC plastic, 6 g. It does not rust outdoors.
Pentru lanțurile din plastic, la metru sau în rolă.
For plastic chains, by the metre or on rolls.

ATZ 101A se înșurubează în filetul Ø35 mm din vârf, iar ATZ 330A prinde lanțul de inelul lui.
The ATZ 101A screws into the Ø35 mm thread at the top, and the ATZ 330A fastens the chain to its ring.
Pe conurile cu buclă în vârf, bucla se taie mai întâi.
On cones with a loop on top, cut the loop off first.
Stâlpul metalic ATD 7580 are 2 inele, prin care treci direct lanțul.
The ATD 7580 steel bollard has 2 rings, the chain goes straight through them.
ATZ 101A se comandă separat.
The ATZ 101A is ordered separately.

ATZ 330A: fixing with the ATZ 101A and ATZ 330A hooks, on a post and on a cone

## Drawings and details · 3/3

Un lanț între 2 stâlpi are nevoie de 2 cârlige, iar fiecare îmbinare între 2 bucăți mai cere unul.
A chain between 2 posts needs 2 hooks, and each join between 2 lengths needs one more.
Pentru un culoar care se deschide zilnic, ajunge un cârlig la capătul mobil.
For a lane that is opened every day, one hook at the moving end is enough.
