| **Reflective** | 4 Honeycomb |
| **Installation** | 6 Plastic Screws |

## Description

In underground car parks, wall corners and support columns are what cars touch most often while manoeuvring. The ATZ R1280 is a black rubber corner guard with an L profile that fits over the edge: the rubber takes the knock instead of the plaster, and its 4 yellow reflective chevrons show the corner in the headlights.

### Technical data

- dimensions: 10 × 10 cm on each side, 80 cm high;
- material: rubber, black;
- reflectors: 4 honeycomb chevrons, yellow;
- weight: 2.1 kg.

### Installation

The guard is fixed with 6 screws, included free of charge, and is easy to fit with nothing more than a drill. If you do not want to drill the wall, it can also be glued with adhesive silicone.

## Where it is used

On wall corners in underground car parks and garages, on square columns in industrial halls, at ramp exits or on building corners next to a narrow entrance.

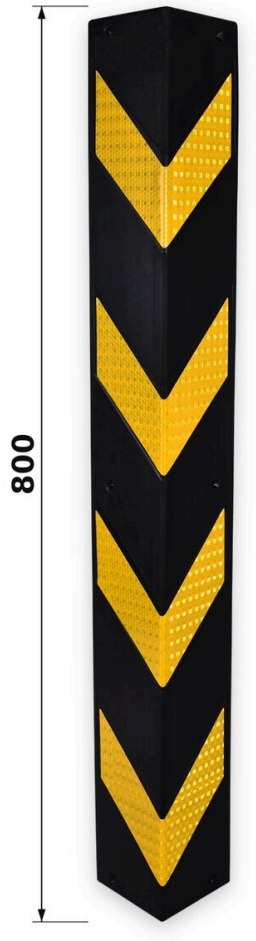

## Other versions

For a taller, 90 cm guard with a rounded profile, see the ATZ 90140 (PVC) and ATZ 90141 (PPC).
