Technical specifications

Material	PPC
Color	Black
Reflective	5 Honeycomb
Installation	6 Dowels Ø8 mm, 6 Screws Ø4 × 38 mm
Outer Dimensions	14 × 14 × 90 cm
Inner Dimensions	9 × 9 × 90 cm

Description

The ATZ 90141 has the same shape and size as the ATZ 90140, but is made of a single material, PPC, and weighs only 1.5 kg. The body is black, and its 5 white reflective chevrons show the edge of the column in the headlights. It is the right choice when you have many corners to cover, for example every column in an underground car park.

Technical data

- dimensions: outer 14 × 14 cm, inner 9 × 9 cm, 90 cm high;
- material: PPC, black;
- reflectors: 5 white honeycomb chevrons;
- weight: 1.5 kg.

Installation

It is fixed with 6 screws, included free of charge. Being light, it can also be glued with adhesive silicone, with no holes in the wall.

Where it is used

On concrete columns in underground and multi-storey car parks, on ramp and stairwell corners, in garages or on warehouse corners that pallet trucks pass.

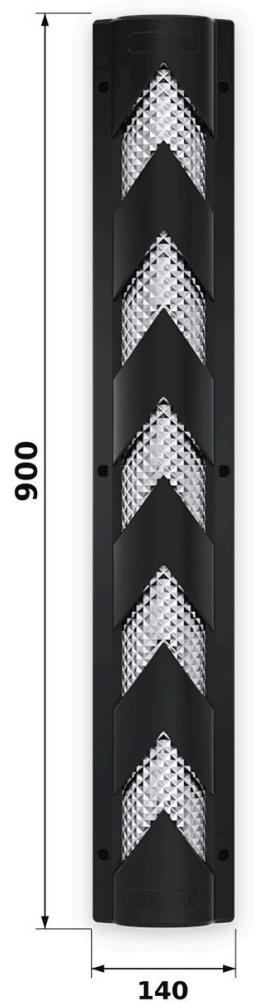

Other versions

With yellow and white chevrons, in PVC and PPC, there is the ATZ 90140. In rubber, with an L profile and 80 cm high, there is the ATZ R1280. For corners hit by forklifts, a steel guard such as the ATO 6353 is a better fit.
