Technical specifications

Type	Cap for the top end of the post
Post diameter	Ø48 mm
Material	Plastic
Installation	Pressed into the end of the post; its ribs hold it, no adhesive or tools

Description

A sign post left open at the top fills with rainwater and rusts from the inside, where nobody sees it, until it gives way. The ATT 48d is the plastic cap that closes the end of Ø48 mm posts and keeps water out of the tube.

Technical data

- for posts with a 48 mm diameter;
- material: plastic;
- ribbed body for a push-in fit;
- weight: 0.05 kg.

Fitting

The cap goes into the end of the post and is pushed fully home. The ribs hold it in place with no adhesive and no tools, and it takes seconds, before or after the sign is fitted.

Which posts

For Ø48 mm road sign posts. The sign itself is fixed to the post with ATT 48c galvanised anti-rotation clamps. For Ø60 mm posts, use the ATT 60d cap.

Where it is used

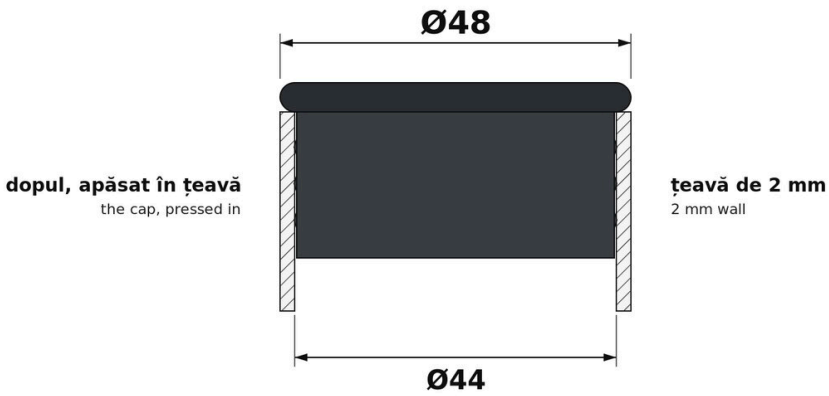

When installing new road sign posts, maintaining existing ones, replacing missing caps, or closing the end of any Ø48 mm tube on roads, in car parks or in yards.

Cum se montează
How it is fitted

ATT 48d

1. Pui dopul pe capăt
Put the cap on the end

2. Îl apeși până la capăt
Press it all the way in

Nervurile țin dopul fix, fără adeziv și fără scule; se pune înainte sau după prinderea indicatorului.
The ribs hold the cap, with no adhesive and no tools; fit it before or after the sign.

Dopul oprește apa de ploaie să intre în țeavă, unde ar rugini stâlpul din interior.
The cap keeps rain out of the tube, where it would rust the post from inside.
