Technical specifications

Type	Cap for the top end of the post
Post diameter	Ø60 mm
Material	Plastic
Installation	Pressed into the end of the post; its ribs hold it, no adhesive or tools

Description

A post cap spends years in sun and frost and sooner or later cracks or goes missing. Without it, the tube fills with rainwater and rusts from the inside. The ATT 60d is the replacement cap for Ø60 mm posts: it closes the top end and keeps water out of the tube.

Technical data

- for posts with a 60 mm diameter;
- material: plastic;
- ribbed body for a push-in fit;
- weight: 0.05 kg.

Fitting

The cap goes into the end of the post and is pushed fully home. The ribs hold it in place with no adhesive and no tools.

Which posts

For Ø60 mm road sign posts, round or flanged. The sign is fixed to the post with ATT 60c galvanised anti-rotation clamps. For Ø48 mm posts, the right cap is the ATT 48d.

Where it is used

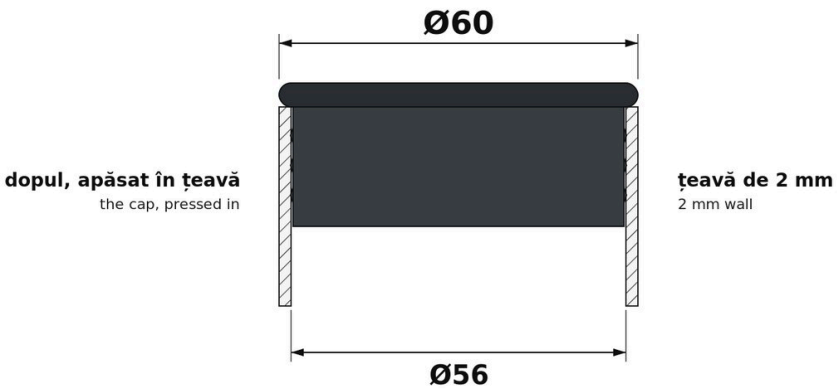

When installing new posts, maintaining existing ones, replacing missing caps, or closing the end of any Ø60 mm tube on roads, in car parks or in yards.

Cum se montează
How it is fitted

ATT 60d

1. Pui dopul pe capăt
Put the cap on the end

2. Îl apeși până la capăt
Press it all the way in

Nervurile țin dopul fix, fără adeziv și fără scule; se pune înainte sau după prinderea indicatorului.
The ribs hold the cap, with no adhesive and no tools; fit it before or after the sign.

Dopul oprește apa de ploaie să intre în țeavă, unde ar rugini stâlpul din interior.
The cap keeps rain out of the tube, where it would rust the post from inside.
