Technical specifications

Material	PP
Reflective	Honeycomb
Thread	35 mm

Description

When works take up both edges of a road or driveway and cars have to pass through a narrower gap in the middle, drivers need warning in good time. The ATZ 777 shows two lines closing in from both sides, in the red-bordered triangle of warning signs.

Technical data

- triangle, 39 cm high;
- material: PP, with honeycomb reflective film;
- 35 mm threaded base;
- weight: 0.45 kg.

Mounting

It screws straight into the thread at the top of a cone or into the socket of a portable post, such as the ATZ 11015R4.

Where it is used

For utility works on both sides of a street, at the approach to a bridge or a narrow gateway, in car parks being worked on along the edges or at events where the lane for cars is reduced.

Tip

Mark out the remaining lane with cones on both sides, so drivers can see exactly where they can pass.

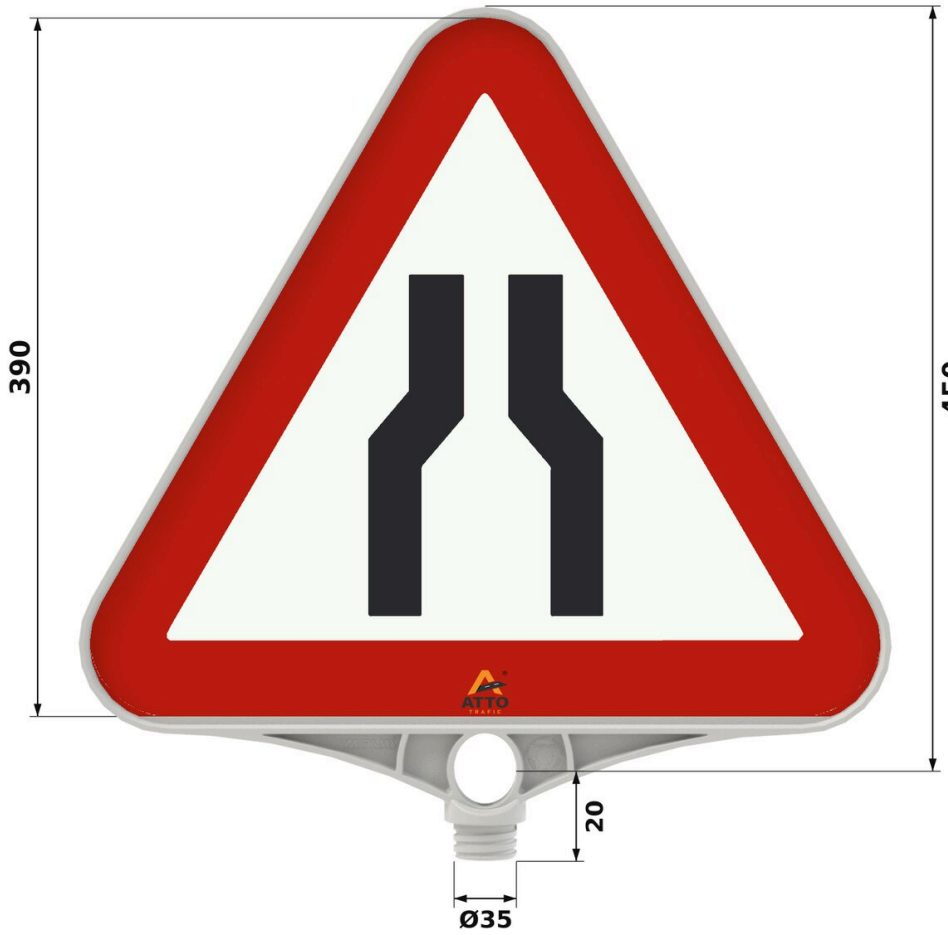

Other versions

If only one side narrows, use the ATZ 775 (left) or ATZ 774 (right).
