Technical specifications

Material	PP
Reflective	Honeycomb
Thread	35 mm

Description

On a road freshly treated with bitumen and chippings, the loose stones fly up from the tyres and hit the windscreen of the car behind or of the one coming the other way. The ATZ 780 warns drivers in good time: the car throwing up stones, on a yellow background inside the red-bordered triangle. On public roads, the same symbol on yellow is the temporary U7 sign in SR 1848-1:2024.

Technical data

- triangle, 39 cm high;
- yellow background, red border;
- material: PP, with honeycomb reflective film;
- 35 mm threaded base;
- weight: 0.5 kg.

Mounting

It screws into the threaded socket of a portable post, such as the ATZ 11015R4, or straight into the thread at the top of a cone. On cones with a loop on top, cut off the loop first. It stays in place as long as there is loose gravel on the surface, then comes off just as easily.

Where it is used

SR 1848-1:2024 calls for this sign on the approach to a section where bituminous surface dressing is being or has been laid, and on roads where granular materials such as ballast or crushed stone are often carried. The 39 cm version suits yard and site roads, the exits of gravel pits and quarries, and yards and car parks covered with crushed stone.

Together with

At low speed the tyres throw up fewer stones, so follow it with the 30 km/h speed limit, the ATZ 549. If the dressing is being laid right then, the zone starts with "Road works", the ATZ 782.
