|---|---|
| **Material** | PP |
| **Print** | Double-sided, arrow to the right on both faces |
| **Reflective** | Honeycomb |
| **Thread** | 35 mm |

## Description

When cars have to turn right, for example into a car park entrance or past a closed section, the ATZ 539 shows them the way with a horizontal white arrow on a blue disc. Both faces carry the same arrow to the right, so the sign reads the same from either side.

### Technical data

- Ø28 cm disc, double-sided, arrow to the right on both faces;
- material: PP, with honeycomb reflective film;
- handle on top, 35 mm threaded base;
- weight: 0.4 kg.

### Mounting

On a cone it screws straight into the thread at the top, with no adapter; on cones with a loop on top, cut off the loop first. On a portable post it goes into the threaded socket, for example on the 120 cm ATZ 11015R4, which lifts it above parked cars.

## Where it is used

At the entrance to temporary car parks and at events, along one-way routes set up for a day, at diversions around a work zone and in company yards, on the way to the loading bay.

## Left-hand version

For a left turn, use the ATZ 538, also double-sided. At a car park, put one of them next to the “Parking” panel, the ATZ 362, so drivers also see which way the car park is.
