Technical specifications

Material	PP
Reflective	Honeycomb
Thread	35 mm

Description

When an obstacle appears in the road, such as a pothole, a stopped machine or a fenced-off area, drivers need to know which side to pass on. The ATZ 540 has a white arrow pointing down and to the right on a Ø28 cm blue disc, and it goes directly in front of the obstacle.

Technical data

- Ø28 cm disc;
- material: PP, with honeycomb reflective film;
- handle on top, 35 mm threaded base;
- weight: 0.35 kg.

Mounting

Most often the sign screws straight into the thread at the top of the first cone in front of the obstacle. On cones with a loop on top, cut off the loop first. It can also go on a portable post with a threaded socket, such as the ATZ 63100R2, whose heavier base keeps it steady on the road.

Where it is used

At road or pavement works, around a broken-down vehicle, in car parks where part of an aisle is closed or on driveways where goods are being unloaded.

Left-hand version

To pass on the left, the arrow pointing down and to the left is on the ATZ 539. To warn before the obstacle, also use a triangular sign such as "Road works", the ATZ 782.
