Technical specifications

Material	PP
Reflective	Honeycomb
Thread	35 mm

Description

The ATZ 539 is the partner of the keep-right sign: the white arrow on the blue disc points down and to the left. Use it when the obstacle is on the right of the lane and the way through stays clear only on the left, for example a service vehicle stopped by the kerb or an excavation along the edge of a driveway.

Technical data

- Ø28 cm disc;
- material: PP, with honeycomb reflective film;
- handle on top, 35 mm threaded base;
- weight: 0.35 kg.

Mounting

On a cone, the sign screws straight into the thread at the top, with no adapter. On cones with a loop on top, cut off the loop first. On a portable post, it screws straight into the threaded socket, for example on the 120 cm ATZ 11015R4, which lifts it above parked cars.

Where it is used

In work zones on roads or in car parks, at the end of a row of cones narrowing the lane, in warehouse aisles when part of the aisle is taken up by goods and at events with temporary routes.

Tip

Place the sign where the narrowing begins, not level with the obstacle, so drivers have time to change course. To keep right, use the ATZ 540.
