Technical specifications

Material	PP
Reflective	Honeycomb
Thread	35 mm

Description

The ATZ 645 is the large version of the "No parking" sign: a Ø38 cm disc instead of 28 cm. The difference shows when the sign has to be read from the driver's seat, from the end of a driveway or from across a yard, not just close up by a pedestrian.

Technical data

- Ø38 cm disc;
- material: PP, with honeycomb reflective film;
- handle on top, 35 mm threaded base;
- weight: 0.4 kg.

Mounting

It screws into the threaded socket of a portable post, such as the 120 cm ATZ 11015R4, which lifts it to the driver's eye level. On a cone, it screws straight into the thread at the top, with no adapter. On cones with a loop on top, cut off the loop first.

Where it is used

At the entrance to large car parks, on private roads, in front of industrial gates, warehouses and office buildings, where cars arrive faster and the sign must be noticed in good time.

Why plastic

The sign is light and moves in seconds. It does not rust, and the reflective film makes it visible at night in headlights.

Smaller
For tight spaces, the Ø28 cm version is the ATZ 545.
