Technical specifications

Material	PPC
Reflective	Honeycomb
Thread	35 mm

Description

STOP requires a full stop before entering a junction or a road. The ATZ 543 has the red octagon with the word STOP on a Ø28 cm disc and is used where stopping must be enforced for a while or on private ground: the exit from a car park, a company yard or a work zone.

Technical data

- Ø28 cm disc;
- material: PPC, with honeycomb reflective film;
- handle on top, 35 mm threaded base;
- weight: 0.35 kg.

Mounting

It screws into the threaded socket of a portable post, such as the ATZ 63315R2, or straight into the thread at the top of a cone. The sign can be swapped or removed without tools.

Where it is used

At the exits of underground and multi-storey car parks, at aisle junctions in warehouses and logistics centres, where lorries leave a building site or at a temporary pedestrian crossing at an event.

At night

The honeycomb film returns headlight beams, so the sign shows in the dark. For extra attention, the same socket can hold a warning lamp instead.

Other signs

For a direction vehicles must not enter, see "No entry", the ATZ 542.
