Technical specifications

Color	Yellow
Optics	Double-sided
Light source	LED
Power	2 × 4R25 6V batteries (not included)
Recommended battery	6V, 7-9 Ah
Switches	On/off with always-active twilight function, steady/flashing light
Fixing system	Fixing bracket included
Carrying handle	Yes
Certifications	CE, RoHS
Autonomy	approx. 710 h with 2 × 7Ah batteries, approx. 4500 h with 2 × 50Ah batteries

Description

The V8-Y2 takes two 6V 4R25 batteries instead of one. That means it runs much longer between battery changes, which helps on works that last weeks or months, where you do not want to check the lamps often.

Batteries

It uses two 6V 4R25 batteries, which are not included: the V8-B67, 6V/7-9Ah, or, for long jobs, the V8-B650, 6V/50Ah. Compared with the single-battery V8-Y, it runs longer between battery changes: about 710 hours with 7Ah batteries and about 4500 hours with 50Ah batteries.

Functions

- flashing or steady light, chosen with a switch;
- on/off switch with an always-active twilight function: it comes on by itself in the dark;
- LED light source and double-sided lens;
- carrying handle and fixing bracket included.

Where it is used

To signal long-running works where there is no mains power: on roads, building sites and the fencing that closes off an area, especially in urban areas.

What the roadworks rules require (Order 1112/411/2000)

SR 1848-1:2024 provides the flashing amber lamp (V8) to supplement reflective signs in work zones. The methodological rules approved by Order MI/MT no. 1112/411/2000 allow this at night and require it on main and connecting streets in towns, where retroreflective temporary signs are supplemented with flashing amber lamps. Where the existing signing is not retroreflective, the lengthwise edge of the work zone is also marked with steady or flashing amber lamps.

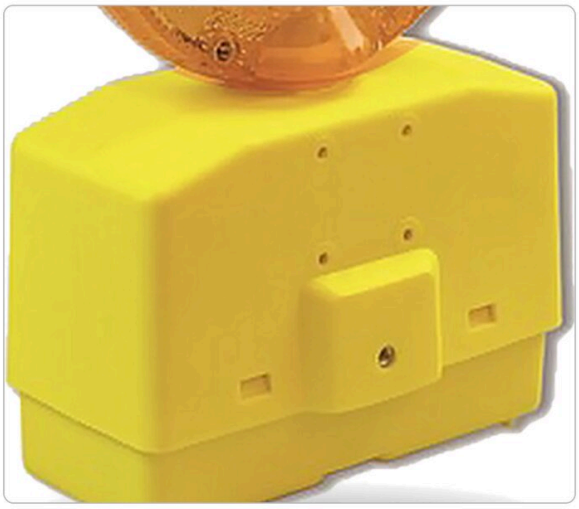

The contractor installs the signing to the layout approved by the road authority with the traffic police's agreement, maintains and completes it for the whole job and removes it at the end; accidents caused by incomplete or missing temporary signing are entirely the contractor's responsibility.
