Technical specifications

Material	ABS, PC
Diameter	Ø30 cm
Dimensions (LED)	5 mm
Solar Panel (Type)	Polycrystal
Solar Panel (Dimensions)	36 × 30 cm
Solar Panel (Power)	10 W
Battery (Voltage)	12 V
Battery (Capacity)	7 Ah
Color	Red
Light	Flashing

Description

The ATO 9531 stays installed in one place and is the size of a traffic signal: a flashing Ø300 mm red disc made of 5 mm LEDs, powered by a 10 W solar panel. It is used at night and in dark places where a reflective metal sign is not enough to catch attention.

Where it is installed

On expressways and town streets, at pedestrian crossings and near schools, on campuses, in residential areas and at junctions.

Solar power

- 10 W polycrystalline panel, 36 × 30 cm;
- 12 V, 7 Ah battery;
- overcharge and deep-discharge protection.

It needs no mains cable: the panel charges the battery during the day, and at night the light flashes on the stored energy.

Technical data

ABS and PC housing, 36 × 36 cm, 9 kg.

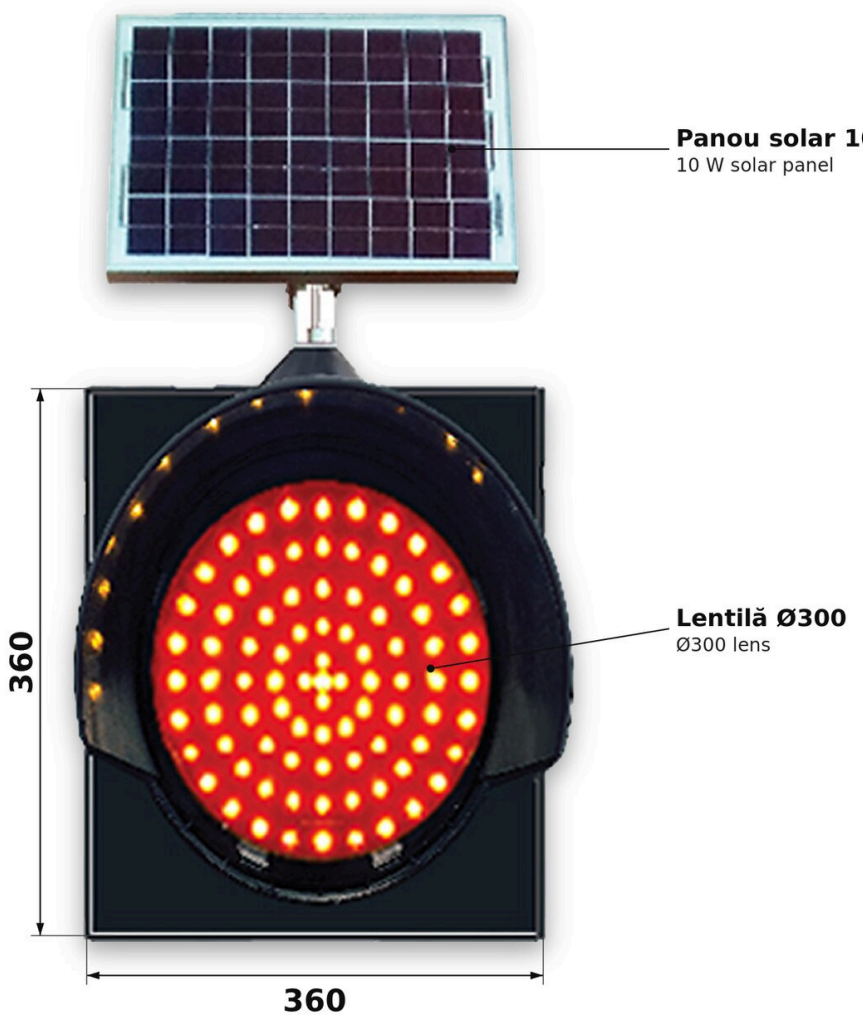

Portable lamps

For temporary roadworks signalling with lamps you can move, see the V8-Y and V8-R flashing lamps or the ATZ 404-R solar lamp, which fits on cones.

Fără cablu la rețea
No mains cable

ATO 9531

Panoul solar încarcă bateria ziua, iar noaptea lampa clipește din energia stocată.
The solar panel charges the battery by day and at night the lamp flashes on the stored energy.
