Technical specifications

Material	PP
Color	Yellow + Black
Link	52.6 × 32 mm
Link Thickness	8 mm
Length	25 m, in one piece
Fixing	With the ATZ 330A hook (not included)

Description

In warehouses, production halls and company yards, yellow and black shows where the hazard is: a loading bay, a rack that must not be touched, the working area of a forklift. The V1-803 is a 25 m roll of 8 mm yellow-black plastic chain, enough to mark off a whole aisle or the edge of a long loading bay.

Technical data

- length: 25 m, one continuous piece;
- size: 8 mm;
- link: 52.6 × 32 mm;
- material: polypropylene (PP);
- weight: 2.5 kg.

Which posts

The yellow ATD 7580 steel bollard has 2 chain rings and the same colours, and together they form a fixed barrier. For areas that move often, use portable posts such as the ATZ 63315R2, or cones with the ATZ 101A hook.

Ends and joins

The chain ends are secured with the black ATZ 330A plastic hook, which clips onto a link.

Other versions

For just a few metres, the 8 mm yellow-black chain is also sold by the metre: the V1-80YB. As a 6 mm roll, the same colours are the V1-603.

What the roadworks rules require (Order 1112/411/2000)

SR 1848-1:2024 provides the polyethylene garland or chain (V1) in built-up areas, to mark off works lengthwise. The methodological rules approved by Order MI/MT no. 1112/411/2000 require the contractor, among other things, to set up dedicated pedestrian corridors on the carriageway when the works take up the pavement. Marking off the work zone belongs to the signing that marks the works, installed after the advance signing.

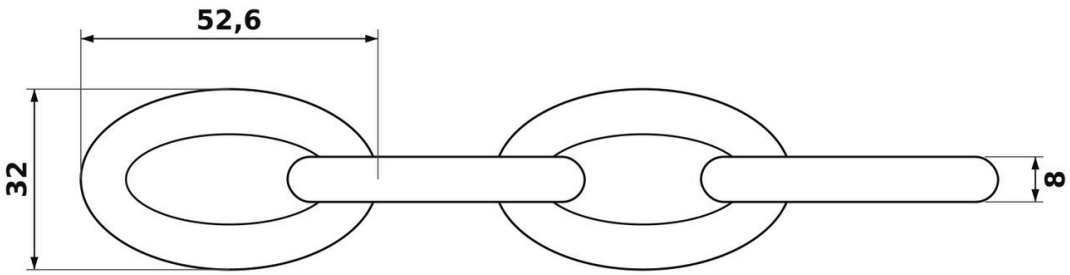

The contractor installs the signing to the layout approved by the road authority with the traffic police's agreement, maintains and completes it for the whole job and removes it at the end; accidents caused by incomplete or missing temporary signing are entirely the contractor's responsibility.
