Technical specifications

Material	PP
Color	Red + White
Link	52.6 × 32 mm
Link Thickness	8 mm
Length	25 m, in one piece
Fixing	With the ATZ 330A hook (not included)

Description

A roll is the right choice when you have long distances to mark off or set up the same kind of area often: construction firms, road works crews, car park operators. The V1-801 holds 25 m of 8 mm red-white plastic chain in one continuous length, with red and white links alternating in sections.

Technical data

- length: 25 m;
- size: 8 mm;
- link: 52.6 × 32 mm;
- material: polypropylene (PP);
- weight: 2.5 kg per roll.

What it is for

It fences off a building site, temporarily closes part of a car park, separates a pedestrian lane alongside works or marks out an area at an outdoor event. With posts every 2 m, one roll covers about 22 m once you let the chain hang slightly.

Posts and accessories

The ATZ 63315R2 and ATZ 11015R4 portable posts, like cones, take the chain at the top: it fastens to the ring of the ATZ 101A hook with the ATZ 330A hook.

If you need less

For just a few metres, the 8 mm red-white chain is also sold by the metre: the V1-80RW.

What the roadworks rules require (Order 1112/411/2000)

SR 1848-1:2024 provides the polyethylene garland or chain (V1) in built-up areas, to mark off works lengthwise. The methodological rules approved by Order MI/MT no. 1112/411/2000 require the contractor, among other things, to set up dedicated pedestrian corridors on the carriageway when the works take up the pavement. Marking off the work zone belongs to the signing that marks the works, installed after the advance signing.

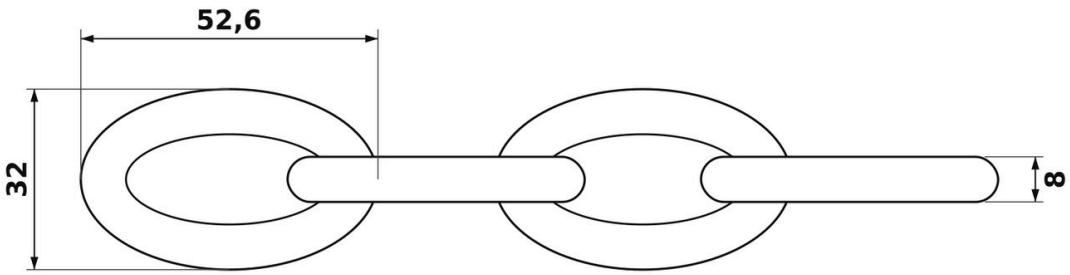

The contractor installs the signing to the layout approved by the road authority with the traffic police's agreement, maintains and completes it for the whole job and removes it at the end; accidents caused by incomplete or missing temporary signing are entirely the contractor's responsibility.
