Technical specifications

Material	PP
Color	Green + White
Link	52.6 × 32 mm
Link Thickness	8 mm
Length	25 m, in one piece
Fixing	With the ATZ 330A hook (not included)

Description

Not every marked-off area has to look like a building site. Green and white chain suits parks, gardens, hotel or restaurant grounds, the edge of a newly sown lawn or an outdoor event, where red and white would look like a hazard warning. The V1-802 is a 25 m roll of 8 mm green-white chain in one continuous length.

Technical data

- length: 25 m;
- size: 8 mm;
- link: 52.6 × 32 mm;
- material: polypropylene (PP);
- weight: 2.5 kg per roll.

Material

Polypropylene does not rust and is light: the whole 25 m roll weighs 2.5 kg. It cleans easily with water.

Installation

On portable posts it fastens at the top, to the ring of the ATZ 101A hook, for example on the ATZ 11015R4, or through the rings of fixed bollards. The ends are secured with the ATZ 330A hook. To work out how many rolls you need, measure the perimeter and add about 10% for the sag between posts.

Thinner version

The same colour combination also comes as a 6 mm roll: the V1-602.

What the roadworks rules require (Order 1112/411/2000)

SR 1848-1:2024 provides the polyethylene garland or chain (V1) in built-up areas, to mark off works lengthwise. The methodological rules approved by Order MI/MT no. 1112/411/2000 require the contractor, among other things, to set up dedicated pedestrian corridors on the carriageway when the works take up the pavement. Marking off the work zone belongs to the signing that marks the works, installed after the advance signing.

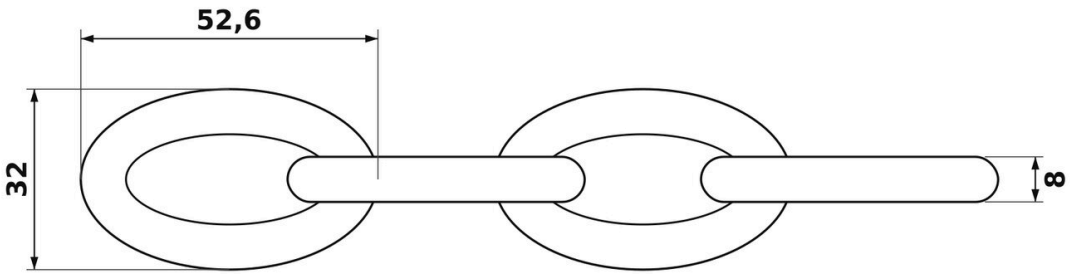

The contractor installs the signing to the layout approved by the road authority with the traffic police's agreement, maintains and completes it for the whole job and removes it at the end; accidents caused by incomplete or missing temporary signing are entirely the contractor's responsibility.
