Technical specifications

Type	LED module
Light colour	Green
Diameter	D-200 mm
Position in the signal head	bottom
Compatible with	V11-20
Fault indication	code on the control unit display

Description

The green light is at the bottom of the V11 mobile traffic light head and gives the go to the direction that has to pass through the narrowed section. The V11-D200-G is the green Ø200 mm LED module, a spare part for the V11-20 set.

When to order it

When a traffic light's green no longer comes on or its lens has been broken. The control unit checks the lamps all the time and shows the green light's code when it fails. You replace only the module, and the rest of the traffic light stays as it is.

Construction

A round module with a black body, a clear lens and LEDs across the whole surface. The green only shows when the light is on.

Technical data

- Ø200 mm diameter;
- 20 × 20 × 10 cm;
- 1 kg.

The full set of lights

A V11 traffic light head has three lights: red (V11-D200-R), yellow (V11-D200-Y) and green (V11-D200-G). For the version without countdown, there is also the complete housing with lights, the V11-SUPORT.
