Dimensions L X W X H	183 × 15 × 10 cm
Color	Black
Reflective	Reflective Tape
Mounting System	Dowels Ø16 × 90 mm (x6), Screws Ø10×110 mm (x6)

Description

At 183 cm long, this stop holds both front wheels in a single piece. There is no gap between two small stops to measure, and it does not matter if the car comes into the space slightly crooked: the wheels still meet it.

It is the heaviest stop we sell, 16 kg of black rubber, 10 cm high. Along its length it carries slanted yellow reflective strips that show up clearly in the headlights.

Fixed at 6 points

It bolts into concrete or asphalt through 6 holes, with 6 anchors Ø16 × 90 mm and 6 bolts Ø10 × 110 mm supplied in the box. You need a hammer drill, a 16 mm bit and a spanner. Because of the weight, it is easier with two people to put it in position.

Where we recommend it

Residential and office car parks, supermarket car parks and shared garages: spaces used every day by different cars, where you want each one to stop on the same line and stay off the pavement or the wall in front.

If you want something lighter

The 190 cm stops in PPC (ATZ 15190) and in compound/rubber (ATZ 15190R) have the same 10 cm height but are much lighter: 6.5 kg and 9.5 kg.
