Technical specifications

Material	Painted Steel
Size (Post)	Ø6 cm
Thickness (Post)	3 mm
Color	Yellow
Reflective	5 Film
Installation	9 Dowels, 9 Screws

Description

A rubber corner guard marks the corner, but it will not stop a forklift or a car. The ATO 6353 is a rigid steel tube guard that wraps round the corner on both sides: it has 3 legs, one at the point of the angle and one at the end of each 60 cm arm, so the vehicle hits the bar, not the corner.

Technical data

- dimensions: 60 × 60 cm, 50 cm high;
- Ø6 cm steel tube, 3 mm wall, powder-coated;
- yellow with 5 black bands;
- weight: 5 kg.

Installation

Each leg has a plate with 3 holes. It is fixed into concrete with 9 anchors and 9 screws, included free of charge.

Where it is used

At the ends of warehouse racking, on the corners of columns and walls in industrial halls, next to machinery or electrical cabinets, and in car parks, on corners that cars cut when turning. The powder coating makes it weather-resistant, so it works outdoors too.

Other shapes

To guard a single side, the ATO 6354 hoop has 2 legs. For a barrier in 2 pieces that goes around an object, see the ATO 6357.
