Description

On a road, a 45 cm post disappears behind the first car. A 75 cm post shows over its bonnet, which is why this is the height used to separate lanes and directions and to mark roadworks. The ATS 8075 brings 10 ATZ 8075 posts in one package.

What you get

- 10 posts in orange RAL 2009 TPU, UV-protected;
- 75 cm tall, Ø8 cm post, Ø20 cm round base, 1.2 kg each;
- metallised reflective bands;
- 3 Ø16 × 90 mm plugs and 3 Ø10 × 110 mm screws for each post.

How it behaves

If a car drives over it, the post bends and comes back upright. It needs no foundation: the base is fixed straight into the asphalt with the plugs and screws in the pack.

How many you need

With a post every 2 m, the 10 posts cover 18 m; with one every 3 m, 27 m.

Other versions

Shorter, for cycle lanes and car parks: the ATS 8045-10 (45 cm). Taller: the ATS 80100 (100 cm). In PE, 15 posts of 75 cm: the ATS 8075E.
