Technical specifications

Material	PE
Size (Post)	Ø8 cm
Size (Base)	Ø20 cm
Base Shape	Round
Reflective	Honeycomb

Description

If you have a lot of short posts to fit, for example along a long cycle lane or around a car park, the PE version keeps the cost down. The ATS 8045E-14 holds 14 ATZ 8045E posts, 4 more than the TPU set of the same height.

The post

- orange PE (polyethylene), flexible, UV-protected;
- 45 cm tall, Ø8 cm post, Ø20 cm round base;
- 2 white honeycomb reflective bands;
- 0.51 kg each.

PE or TPU

The PE post is lighter than the TPU one (0.51 kg against 0.93 kg), and its bands are honeycomb rather than metallised. For a row that shows by day and by night at a low price, it is the right choice.

Fitting and quantity

Each post is fixed into the asphalt with 3 plugs and 3 screws, included. With a post every 5 m, the 14 posts cover 65 m of lane.

Other versions

In PE, taller: the ATS 8075E (15 posts of 75 cm) and the ATS 80100E (12 posts of 100 cm). In TPU, 10 posts of 45 cm: the ATS 8045-10.
