Technical specifications

Material (Cone)	PE
Material (Indicator)	PP
Base Shape	Hexagon
Reflective	Honeycomb

Description

The tallest of the cone and sign sets. The cone is 90 cm, and with the sign on top the set reaches 130 cm, so drivers see it from far away, even on a busy street with cars parked on both sides. The ATS 3291-545 is the set for places where a small cone would go unnoticed.

What is in the set

- the V6-90AR2E cone: matt orange PE, 90 cm, 2 white honeycomb bands set high, at headlight level, 48.5 × 53.7 cm weighted hexagonal base, 5.95 kg;
- the ATZ 545 sign: No Parking, Ø28 cm, with honeycomb reflective film.

Stability

The cone has a thread at the top and the sign screws straight into it, with no adapter. On cones with a loop on top, cut off the loop first. Almost all of the cone's weight is in the base, so the 6.5 kg set stays upright when lorries pass or the wind blows.

Where it is used

On main streets and boulevards, at a site entrance, in front of a building where a large vehicle has to stop, or on a stretch of road that must be kept clear for an event.

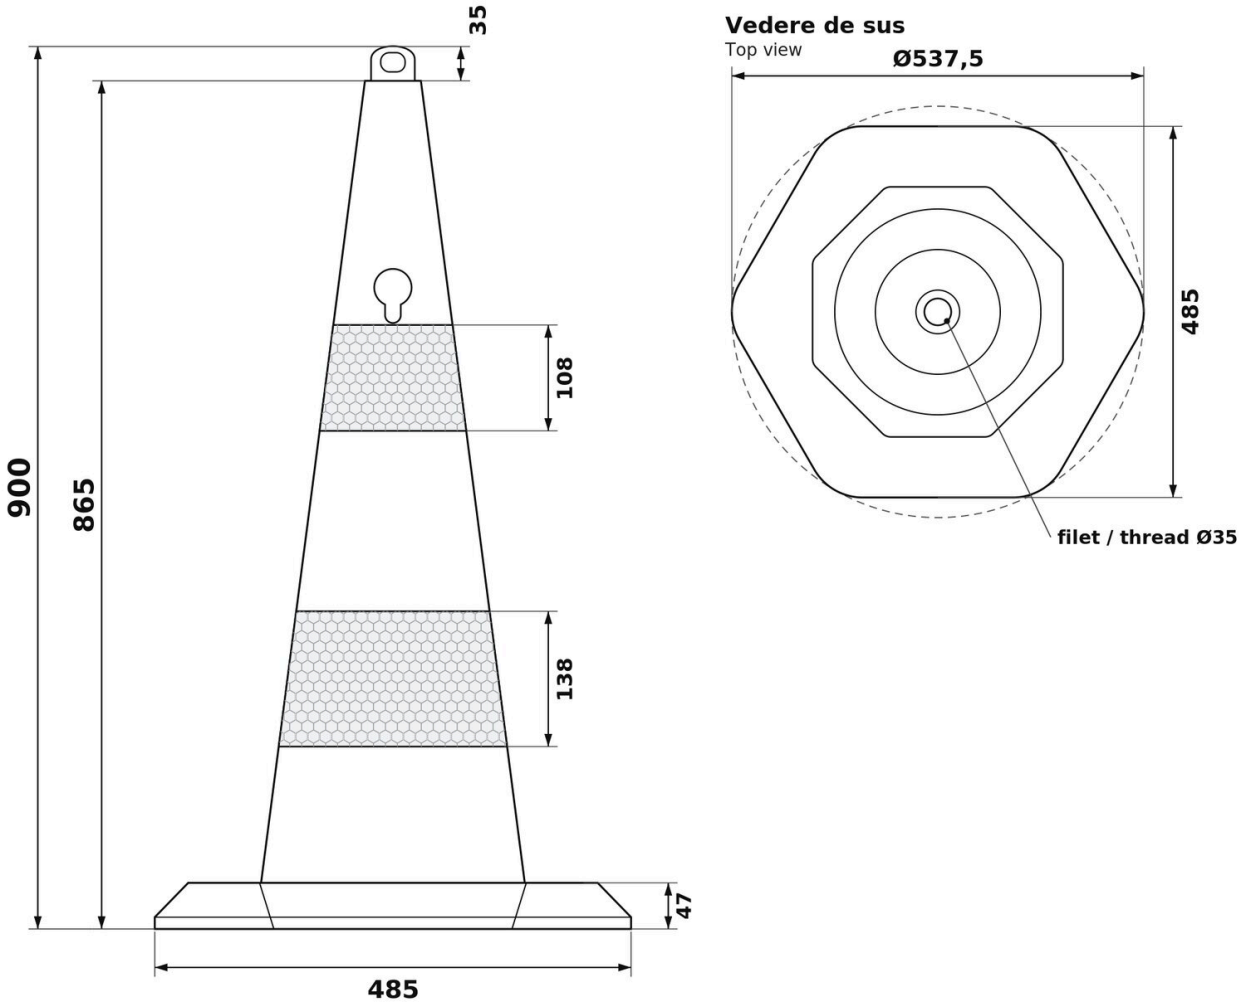

Other versions

Shorter and lighter, at 75 cm, is the ATS 3271-545. For car parks and yards, the ATS 3060-545 has the 60 cm parking cone.
