Technical specifications

Material	Zinc-coated pipe
Wall Thickness	2 mm
Diameter	48 mm
Height	300 cm
Base Plate	15 × 15 cm

Description

On a concrete platform, a ramp or a paved pavement you cannot dig a hole for a foundation. The ATZ M348 has a 15 × 15 cm square plate at the base, stiffened with gussets, that bolts straight onto concrete, and its tube has the same diameter as the standard post, Ø48 mm, so it takes the same clamps and the same cap.

Technical data

- diameter: Ø48 mm, 2 mm wall;
- length: 300 cm;
- material: galvanised tube;
- 15 × 15 cm base plate with 4 holes and stiffening gussets;
- fixings included free of charge;
- plastic cap at the top;
- weight: 9 kg.

Installation

Stand the post on a concrete surface, mark the 4 holes, drill them and tighten the bolts. The sign is fixed with ATT 48c galvanised clamps, 2 for a normal-size sign. The spare cap is the ATT 48d.

What goes on it

Road signs and traffic mirrors: the ATZ 6080 and ATZ 6460 come with a fixing for posts between Ø48 and Ø85 mm.

Where it is used

In multi-storey and underground car parks, on industrial platforms, at warehouse entrances, on pavements and concrete yards, wherever a foundation cannot be poured.

Other versions

For a poured foundation, the Ø48 mm galvanised post ATT 48×2_3, 300 cm. For a large sign or two signs on one post, the Ø60 mm galvanised post ATT 60×2_3.5, 350 cm.
