Technical specifications

Material	TPU
Color	Black
Diameter	Ø8 cm
Reflective bands	2, yellow, honeycomb
Base	No base of its own
Used with	V18-20 base

Description

The V18-45B is the post of the V18-2045 separator, without the rubber base. It is 45 cm high and Ø8 cm, and near the top it carries 2 yellow bands, with a honeycomb reflective pattern.

The lower end

It has no foot. It ends in a round collar, and above the collar the body is ribbed.

How it is installed

It goes into the socket in the middle of the V18-20 base. The base fixes to the carriageway with 2 dowels and 2 screws.

The flexible post

TPU is an elastic material. If a wheel or a wing mirror clips the post, it bends and returns to its original position instead of snapping.

When to buy it on its own

The post is also sold on its own, as a spare part: if one is damaged, you replace only the post and keep the V18-20 base. Fitted in the base, it makes the V18-2045 separator, used to separate lanes before junctions and along the edge of cycle lanes.

The other height

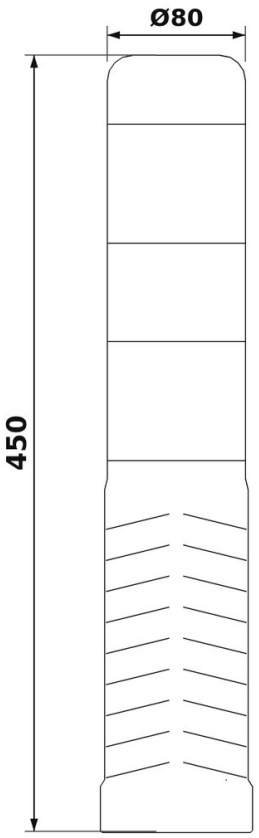

The 75 cm version is the V18-75B.
