Technical specifications

Material	TPU
Colour	Orange
Height	75 cm
Diameter	Ø8 cm
Base	No base of its own
Reflective bands	3
Fixing	In the V18-10 base

Description

The V18-75 is 75 cm tall and Ø8 cm. It is an orange TPU post with 3 reflective bands near the top, used to separate directions or lanes, mark access lanes in restricted areas, signal roadworks and show the way around an obstacle. It has no base of its own: it ends in a round collar and goes into the yellow V18-10 base.

It flexes and springs back

When a car drives over it, the post bends and returns to its original position. The material is weather-resistant and UV-protected, made for outdoor installation.

Technical data

75 cm high, Ø8 cm, no base of its own. Fitted in the V18-10 base, it makes the V18-1075 separator.

Compared with the other posts

The V18-75 is as tall as the ATZ 8075 post, 75 cm. The ATZ series posts have their own Ø20 cm base; the V18-75 does not, it sits in the V18-10 base.

Where it is used

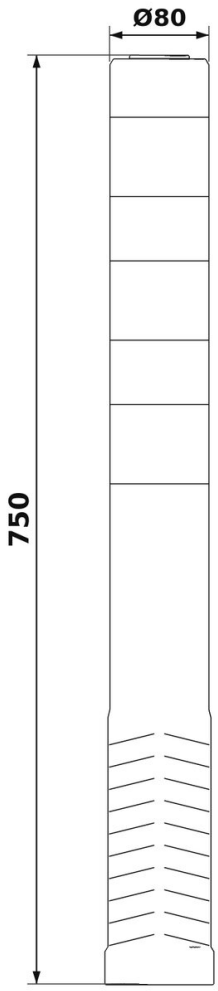

On public and private roads, in car parks, at roadworks and on company internal roads, wherever you need a visible separation that does not break at the first knock.
