Technical specifications

Material	TPU
Size (Base)	Ø20 cm
Color	Black
Reflective	Honeycomb, Metalized
Installation	3 Dowels, 3 Screws

Description

This is the black version of the ATO 2185 guidance post. It is installed at the nose of traffic islands and lane separators or in front of an obstacle in the carriageway, and tells drivers to keep right.

What drivers see

The panel at the top has the blue keep-right sign with diagonal yellow-black stripes below. The black post carries yellow reflective bands. The honeycomb and metallised reflective finish makes the post visible at night too.

Material

The post is made of TPU, flexible and weather-resistant, so a knock from a wheel or a wing mirror does not break it. The Ø20 cm round base is the same as on the ATO 2185.

Technical data and installation

85 cm high, Ø20 cm round base, 2.2 kg. It is fixed into asphalt with 3 anchors and 3 bolts, which are included.

Versions

Orange, 85 cm: ATO 2185. Black, 90 cm, with a rectangular base: ATO 2196.
