Technical specifications

Material	Painted pipe
Wall Thickness	2 mm
Diameter	48 mm
Height	120 cm

Description

When a sign only has to stay up for a few days, at road works or an event, there is no point pouring concrete. The ATZ M12048 is a 120 cm painted-tube stand with three legs at the base that stands on its own on asphalt, pavement or packed ground and moves in minutes.

Technical data

- height: 120 cm;
- painted tube, Ø48 mm, 2 mm wall;
- three-legged base;
- weight: 3 kg.

What goes on it

The tripod holds a temporary sign or a safety barrier. Because the tube is Ø48 mm, the sign is fixed with ATT 48c galvanised clamps: a normal-size sign needs 2 clamps, one at the top and one at the bottom.

Where it is used

At road or pavement works, around a closed-off area, at a site entrance, in car parks and at events, wherever signage stays for a few days and then goes.

In the wind

If the sign is large or the spot is exposed, weigh down the tripod legs so it does not tip over.

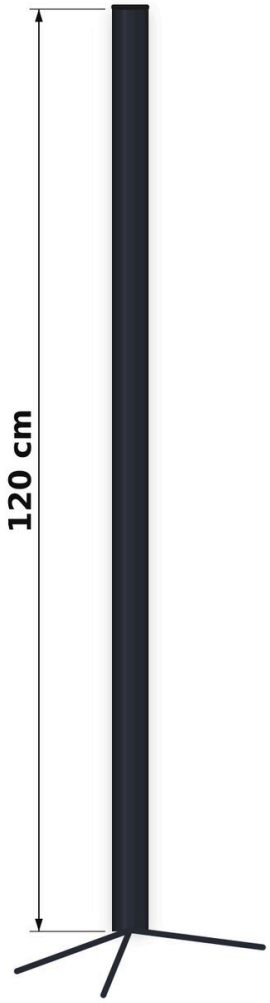

For fixed installation

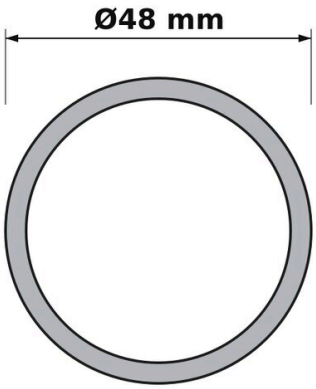

For a permanent sign, choose a galvanised post set in concrete or a flanged post bolted to the ground.
