Technical specifications

Material	TPU
Size (Post)	Ø8 cm
Size (Base)	Ø20 cm
Color	Black
Reflective	4 Metallic
Installation	3 Dowels, 3 Screws
Base Shape	Round

Description

A one-metre black post with 4 metallised reflective bands. It is the tallest in the black series and is used where the separation must be seen from a distance: on the internal roads of an industrial site, at car park entrances and on restricted access lanes.

Material

The post is made of TPU (thermoplastic polyurethane), with increased resistance to UV and weather. It is flexible: on impact it bends, then returns to its original position.

Technical data

100 cm high, Ø8 cm post, Ø20 cm round base, 1.7 kg. The reflective bands are spread over the upper part of the post.

Installation

It is fixed straight into asphalt with the 3 anchors and 3 bolts included. A 36 m line with a post every 4 m needs 10 posts.

Other versions

The ATZ 8075-BK is the 75 cm black version. In PE, the black 100 cm post is the ATZ 80100E-BK, and in orange TPU it is the ATZ 80100.
